BULGARIA'S COASTAL CONSTRUCTION STOPS IN THE SUMMER
09:00 Wed 22 Feb 2006

Construction works on the territory of Sunny Beach resort will stop on May 15, mayor Nikolai Trifonov said.

The ban will be valid during the entire summer season, Dnevnik newspaper reported. It will end in September, once tourists start leaving the resort.

For Nessebar, the new regulations will be in force starting June 1. Once constructions stops, owners have to ensure safety of the sidewalks surrounding the buildings.

During the summer all heavy machinery needs to be taken out of the resorts.

In May construction works will also cease in Pomorie municipality, though the first tourists there are expected to arrive in April.

If construction works are underway after the announced dates, owners will be fined. In Primorsko the fine totals 1000 leva, mayor Dimitar Dimitrov said. Construction works are occurring on more than 50 hotels in the city.
